

Master Hi Ex™

Australian made and owned, **MASTER Hi Ex** is completely bio-degradable and non-toxic.

MASTER Hi Ex is your first line of attack with all class 'A' and 'B' fires in areas of confined spaces such as mineshafts, tunnels, basements, storerooms and ships holds. When proportioned at between 1 - 2% this will provide rapid fire control and extinguishment by creating an inert atmosphere by filling the area with bubbles. With **MASTER Hi Ex** and its modern technology all flammable products are locked in under a tight molecular structure of tightly formed bubbles withholding any available oxygen.

MASTER Hi Ex - It Works!

- Expansion Factor of 300:1 to 2000:1 can be achieved through Conventional Hi Expansion Equipment
- Completely bio-degradable and non-toxic.
- Identifiable pails with easy to read labelling
- Available in colour coded 20L pails, 205L Drums or 1000L Bulk Containers
- Quality product at very reasonable pricing.
- Molecular structure formulated specifically for withholding available oxygen during fire attack.

MASTER Hi Ex - Packaging

MASTER Hi Ex comes to you in easily identifiable pails with convenient colour coding and easy to read labelling, giving you the right product for the correct fire every time.

MASTER Hi Ex - Application

With MASTER Hi Ex the use of conventional hi-expansion foam generation equipment with the product proportioned in the range of 1 to 2%. For best results use fresh water or (sea water if unavailable).

Rates of Application listed below;

- **Conventional Hi Expansion Equipment @ 1 to 2%**
